REPORT SWE023-002-006-1
MATERIAL HOIST PML-06
FOR SWIFT EQUIPMENT

DECLARATION OF CONFORMITY

The self-propelled material hoist model PML06, is a modified scissor lift designed to hoist and support materials in accordance with the following specification.

Maximum Capacity:	270kg
Maximum Platform height:	5.8m
Platform size:	0.8m X 1.72m
Wind Speed:	0m/s (indoors only)

The load must be positioned with its centre of mass located at the centre of the platform and secured using the tie down points provided. Control is via wireless remote control operable from the ground. The platform is uninsulated. Personnel are prohibited from access to the platform.

The platform has been tested and conforms to the relevant requirements of: AS/NZS1418.10:2025 Cranes Hoists and Winches – Mobile Elevating Work Platforms with respect to stability and strength.

A handwritten signature in blue ink, appearing to read 'Peter W', with a long horizontal stroke extending to the right.
